London, UK
Phone: available on request

PROFILE

Product-minded cybersecurity and software professional who finds what people or organisations need and turns unclear, inefficient or risky work into practical systems people can use.

CAPABILITIES

- Security engineering and OSINT
- Python, JavaScript and C#
- React, Express and Flask
- SQLite, Docker and WebSockets
- Splunk, Datadog and automation
- Product design and mentoring
- IT administration and operations

EDUCATION

PGDip Network & Information Security
Distinction, Kingston University London, 2026.
Capstone: MyMark.

BSc Cyber Security & Digital Forensics
2:1, Kingston University, 2024. Dissertation led to the Device Provisioning Toolkit.

A-Level EPQ
Security vs Practicality research project.

REFERENCES

Mr. Gavin Ngulube - Director, Xeyus Ltd
Mr. Jonathan Coleman - Director, Lunarversal

I build what should exist

Useful systems shaped around real people and real work

EXPERIENCE

IT & Administration Support (Intermittent) Jul 2025-Present
GMT Electrical Services Ltd
Developed the company website and a staff portal for timesheets, audit checks and job cards; supports email, invoicing, calls and operational coordination.

Project & Creative Director, Trustee May-Jun 2025
CERRF
Directed Inspector and HackerGo cybersecurity learning tools across workshops, product storytelling, UX/UI, GitHub integration and MVP delivery.

Student Mentor & Teaching Assistant Jan-Mar 2025
Kingston University London
Supported undergraduate labs in Splunk, Datadog, AI automation, cloud data systems and Linux-based technical work.

Systems Engineer & Data Analyst 2023-2025
Lunarversal
Worked across monitoring, Salesforce automation, GitHub access and testing, API configuration, OAuth and token-based integrations.

Security Engineer 2022-2023
Xeyus Ltd
Delivered penetration-testing support, security consultancy and GDPR-focused technical work.

SELECTED BUILDS

Inspector
Institution-pilot cybersecurity learning platform with story-led lessons, a block command editor, isolated Docker terminals and a beta Containerlab network editor.
[Express](#), [WebSockets](#), [SQLite](#), [Docker](#), [PASETO](#), [Containerlab](#)

MyMark
Postgraduate Diploma capstone: a privacy-aware media-provenance and anti-abuse research system addressing image-based abuse and sextortion through accountable verification.
[Python](#), [FastAPI](#), [Vue](#), [Electron](#), [SQLite](#), [Ed25519](#)

FlowCue
Public-beta local/LAN show controller synchronising controller, performer and audience screens for churches, business presentations and live stages.
[React](#), [Vite](#), [Express](#), [Socket.IO](#), [SQLite](#), [Electron](#)

Device Provisioning Toolkit
Security-focused comparison and provisioning web app developed from the undergraduate dissertation.
[Python](#), [Flask](#), [SQLite](#), [Graphviz](#), [Pandas](#)
